

FOLD A FROG INSTRUCTIONS!

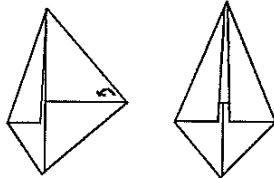

1. Place frog side down. Fold in half, first one way and then the other. **Open again.**

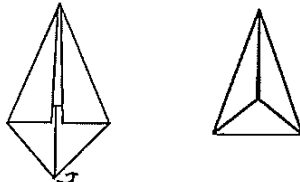

2. Fold each corner to the center.

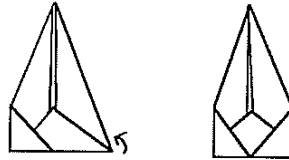

3. Fold the sides in, meeting in the middle.

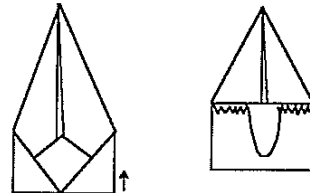

4. Fold the bottom up.

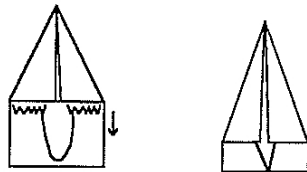

5. Fold the sides in, with the points meeting halfway.

6. Fold the bottom up, about one third of the way up.

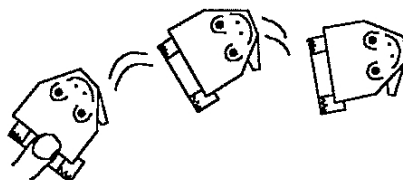

7. Fold the bottom down.

8. Fold the top point down.

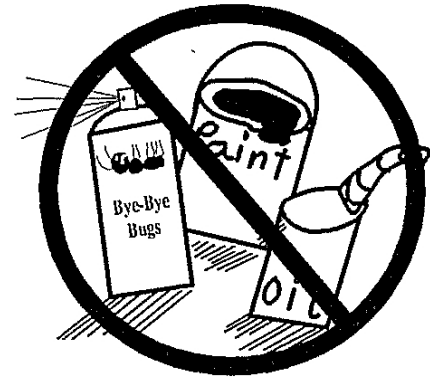

9. Press your finger down on the frog's back. Slide your finger off and watch the frog jump!

"Please help keep our creeks, lakes and rivers clean!"

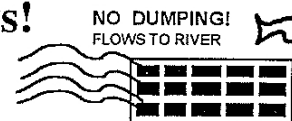

How can you and your family help keep all those things that pollute out of our creeks and rivers? It's easy!

- Find out where to take motor oil to be recycled. One pint of oil can make a slick larger than a football field!
- Use a biodegradable car wash. Even better, take your car to a carwash that reuses wash water before sending it to the sewer system for treatment.
- Use your pooper scooper for your pet, and put poop in the trash. Pet waste is full of bacteria that can make people sick.
- Use pesticides and fertilizers wisely and never when there's a chance of rain.
- Ride your bike or the bus, or car pool with a friend. When it rains, air pollution turns into water pollution!

Remember, what you let flow into our storm drains, will go directly to our waterways!
